Portfolio Objectives: To grow capital over the medium term by investing in a concentrated portfolio of high quality companies and to outperform global equities over the economic cycle.

Strategy: We use a fundamental bottom-up approach to identify attractive investment opportunities. We have a 5 year investment horizon. We focus our investments in 15 to 25 high quality companies. Being concentrated sharpens our decision making and gives us a better understanding of our investments. We invest in companies that demonstrate strong governance, high profitability, low capital intensity, strong economic moats and low business risk. We invest globally, without sector/geographic restrictions. We actively tilt our style and risk exposures to account for prevailing market conditions.
